LEGENDS OF Novus

Fantasy Adventure Boardgame

Welcome to Novus, a fantasy world strife with danger at every turn. A powerful magical energy storm, "The Maelstrom", changed the world over a century ago. Terrifying monsters threaten the future of Novus, from undead & orcs, to deformed animals & magical creations. Most devastating are the extremely powerful Quest Creatures, including a dragon, a demon, a lich, & more...

1 to 5 players will make their way across the world, in paths of their choosing, in this "sandbox" style game. Their goal is to find equipment, develop skills and experience, and gather gold. As they do so they will encounter creatures, and choose when to face off against one of the powerful Quest Creatures. The first player to earn 25 XP, and defeat at least one of these Quest Creatures, will win the game.

- Single play games, no predetermined paths to take.
- Constant decisions to be made with abilities, cards, travel direction, when to explore, and much more!
- A large, visual representation of your character, class, and equipment.
- You may advance into 10 different dual classes, increasing your power and abilities.
- With so much variability and choice, every game is a different epic experience in your quest to become a Legend of Novus!
